# The Heritage

Where heritage meets the future of oenology.

For over **40 years**, Caveduke has occupied the intersection of traditional craftsmanship and precision engineering, all from **Barcelona**. We do not manufacture appliances; we hand-build architectural instruments designed to protect the world's most prestigious wine collections.

# The Active Shield I

## Vibration Fatigue

Standard compressors 'shake' the wine. Our *CaveDuke anti-vibration* technology ensures absolute molecular stillness.

## Thermal Shock

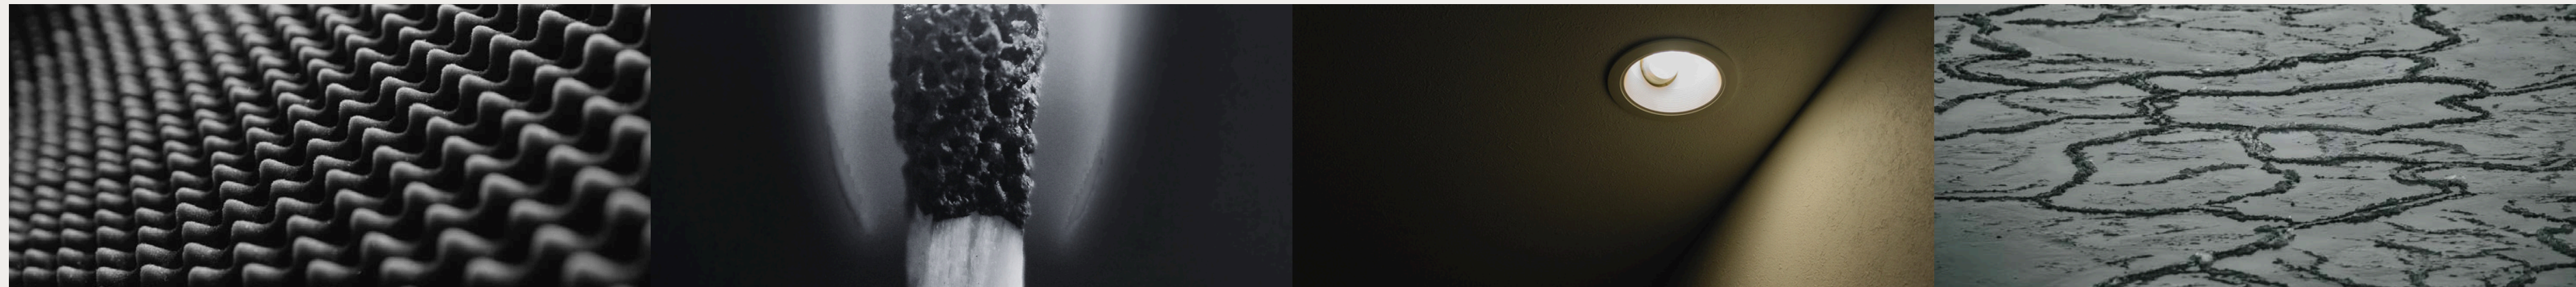

Fluctuations 'cook' the tannins. We maintain a constant  $\pm 0.5$  °C precision, regardless of external climate.

## Light Strike

UV rays age wine prematurely. Our argon-filled, dual-pane glass provides a 99% UV-protective shield.

## Cork Desiccation

Dry air allows oxygen in. Active hygrometry management keeps humidity locked at the ideal 65 - 75%.

# The Active Shield II

## Acoustic Excellence

Designed for living spaces. Our units operate at a near-silent decibel level (<40 dB), quieter than a library.

## Modular Reliability

Built for longevity. Our high-end modular components allow for simple local servicing anywhere in the world, ensuring your investment is never obsolete.

## Danfoss–Secop Precision

We exclusively utilize *Danfoss–Secop* compressors—the quietest and most reliable in their category. This represents the gold standard in cooling efficiency and vibration-free performance.

## Aesthetic Integration

We speak the language of architects. From matching cabinetry wood to custom LED temperatures, the system disappears into your design.

“A Caveduke is not born on an assembly line. It is a 'one-of-one' creation, meticulously handcrafted in our Barcelona atelier. We reject mass production in favor of 'Slow Luxury'—where every joint, weld, and finish is executed by a master craftsman.”

# From Concept to Collection

## Technical Discovery

Personal consultation to audit your space, bottle count, and aesthetic vision.

1

## Tailoring

Selection of bespoke materials, noble timbers, and precise climate configurations.

2

## Craftsmanship

8–12 weeks in our Barcelona atelier. Join us via FaceTime or visit our facility to see your unit come to life.

3

## Delivery

Museum-grade crating and insured international logistics to your door.

4

# Contact Us

Wine deserves more than storage.  
It deserves a space designed with intention.
